

2023 State Protocol Suite ICONS GUIDE

Icons are included in the protocol suite to make them more user friendly. The icons are a quick draw for the eye that establishes the required level of provider licensure for the specific treatment referenced, establishes treatments that are specific for pediatric patients, or when providers should contact medical control.

The lack of icons in certain sections of protocol indicate those portions of protocol refer to all licensed providers.

Below are the icons found throughout the protocol suite.

Contact Medical Control

Pediatric Treatment/Dose

EMT Level Treatment (Note: Certain treatments that are traditionally EMT level may be selected by the MCA for MFR providers as well. Check the yellow selection box to confirm. Example: I-Gel Supraglottic Airway Placement)

Advanced EMT Level Treatment (Note: Formerly known as Specialists)

Paramedic Level Treatment

Special Note: This legend is provided by the Marquette Alger Medical Control Authority for informational purposes only. This is not representative of the Bureau of Emergency Preparedness, EMS and Systems of Care.
